EXPERIENCE

California Professional Engineer....CE 24248

Employed by the State of California for thirty-seven years. During this period I held the following positions:

Three years of Structural Design for the State Owned Toll Bridges at the San Francisco-Oakland Bay Bridge.

Twenty-eight years as Office of Structures Representative and/or Resident Engineer for the administration of construction contracts for highways and bridges in California. Included in this period was a four-year period of administering construction contracts for a light rail system for the San Diego Metropolitan Transit Development Board.

Three years as a Senior Transportation Engineer reviewing highway construction projects as an Area Construction Engineer in the San Diego Area, District 11.

Last three years of my career with the State of California, Caltrans, was as a Supervising Transportation Engineer performing the duties as Caltrans Headquarters Construction Coordinator reviewing highway and bridge construction projects in District 5, San Luis Obispo area, District 7, Los Angeles area, District 8, San Bernardino area and District 11, San Diego area.

During my career with the State of California I have taken part in presenting various types of construction courses given to Caltrans Resident Engineers and Office of Structures Representatives. These courses included the following: Bridge Deck Construction, Building Construction, The Resident Engineers Academy, Potential Claims and Claims and Negotiation.

I am a member of the Dispute Review Board Foundation. I have completed DRB Administration and Practice Workshop and have completed the DRB Charing Workshop. I have been a DRB member on several contracts in the San Diego, Imperial County, Riverside, Fresno and Los Angeles areas.
